

# **Letter of Undertaking**

Dear Leaders and Colleagues,

I am writing this Letter of Undertaking to express my commitment and dedication to the field of data science. As a data scientist, I understand the significance of ethical practices, professionalism, and continuous learning in this rapidly evolving domain. I hereby pledge to abide by the principles outlined in this letter throughout my career in data science.

## Ethical Conduct:

I solemnly affirm to uphold the highest ethical standards in all aspects of my work as a data scientist. I will ensure the privacy, confidentiality, and security of data entrusted to me. I will adhere to legal and regulatory requirements, and I will not engage in any activities that may compromise the integrity of data or harm individuals or organizations.

## Professionalism:

I commit to maintaining a professional demeanor and fostering a collaborative environment within the data science community. I will respect the contributions of fellow professionals, promote diversity and inclusivity, and encourage the exchange of knowledge and ideas. I will continuously enhance my technical skills and stay updated with the latest advancements in data science.

## Objective-driven Analysis:

I pledge to conduct data analysis and interpretation with objectivity, rigor, and scientific integrity. I will critically evaluate data sources, employ appropriate statistical methodologies, and ensure transparency in reporting results. I will communicate findings accurately, avoiding misrepresentation or manipulation of data to support personal or biased agendas.

## Continuous Learning:

Recognizing the ever-evolving nature of data science, I am committed to continuous

learning and professional development. I will actively seek opportunities to enhance my knowledge and skills, attend conferences, workshops, and training programs, and engage in self-study to stay at the forefront of emerging techniques and technologies in data science.

Social Responsibility:

I acknowledge the potential impact of data science on society and will exercise my skills responsibly. I will consider the ethical implications of my work, respect the rights and well-being of individuals, and strive to contribute positively to the advancement of society through data-driven insights and innovation.

I understand that any breach of this Letter of Undertaking may result in disciplinary action and damage to my professional reputation. I am fully committed to upholding the principles stated herein and will hold myself accountable to the highest standards of ethics and professionalism in the field of data science.

Sincerely,

Promisor:DONG XUEYING
